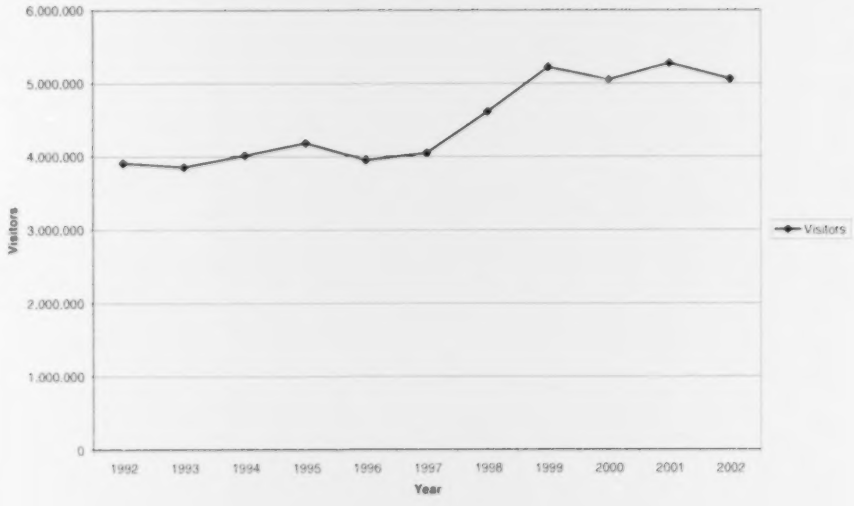
PARK VISITOR STATISTICS 1992 TO 2002

Provincial Park Visitors - 1992 to 2002



Manitoba

Building for the Future

103-06117/

FOREWORD

The year 2002 was the 33rd year for visitor statistics to be collected in Manitoba Provincial Parks. Statistical information for the period 1992 through to 2002 is contained in this report, with park and campground-specific information provided in the Appendices.

Although many provincial parks remain open for public use year-round, reported statistics primarily address the summer season of May to September. Camping statistics include unit nights sold and occupancy rates, and are based upon permit and revenue remittances, occupied campsite counts and an annual campsite inventory. Vehicle attendance statistics are based upon figures collected from automatic traffic counters (estimates in the case of counter malfunctions), and information from periodic visitor surveys.

As of July 1, 2002 there were 76 provincial parks and 16 park reserves with a total combined land base of approximately 4.7 million hectares, or 7.1 percent of the total land base of Manitoba. Available sites in 2002 included approximately 4,287 transient campsites, of which 2,526 or 58.9 percent were available for reservation, and 1,543 seasonal campsites. In terms of services, campsites were divided into: 3,694 (63.4 percent) basic, 1,930 (33.1 percent) electrical, 9 (0.2 percent) water & electrical and 197 (3.4 percent) full service sites.

In 2002, a total of 170,841 transient unit nights were sold. This was down 4.2 percent from the 2001 figure of 178,276 transient unit nights sold, but up 10.3 percent from the average of 1992 through to 2001. Provincially, 2002 transient camping demand represented 30.8 percent of unit nights available. There were 1,496 seasonal campsites sold in 2002 (up 10.4 percent from the average of 1992 through to 2001 and up 1.4 percent from 2001), representing an estimated 44,880 additional unit nights of camping use.

In terms of vehicle attendance, an estimated 1,444,196 vehicles were recorded entering Manitoba's provincial parks in 2002. This was down 4.1 percent from the 2001 figure of 1,506,397 recorded vehicles, but up 14.7 percent from the average of 1992 through to 2001. Assuming 3.5 persons per vehicle, park attendance was approximately 5.1 million people.

The observed slight decrease in visitation over that reported in 2001 can be largely explained on the basis of weather. First, favourable weather in 2001 boosted summer visitation that year. Second, a late spring in 2002, combined with higher than normal summer rainfall throughout southern Manitoba resulted in a marginal drop in visitor numbers.

A significant change to the delivery of the Manitoba Parks program over the past five years has been the introduction of the Parks Reservation Service. In 2002, the Parks Reservation Service offered reservations in 38 campgrounds, 15 group

use areas and two cabin locations through a toll-free number. The service has been responsible for an observed shift in campground use over the past six years. Traditionally lesser-used facilities are becoming busier, as customers opt for alternative locations as their first choices become unavailable. For stays of short duration, weather is becoming less of a factor because of the commitment that is made when making a reservation. In addition, a higher proportion of total unit nights is taking place on weekends, as the reservation service takes away the uncertainty of finding a campsite during busy times.

Inquiries regarding the statistics reported in this document or a further explanation of the methodology are welcomed. Copies of this publication are distributed to other Manitoba government agencies, park agencies across the country and selected libraries.

Inquiries should be directed to:

Linda Novak, Special Programs Co-ordinator

1.0 CAMPING STATISTICS METHODOLOGY

Camping statistics are based primarily upon information obtained from camping permits. These permits are issued via two systems:

- the Standard Camping Permit system; and
- the Self-Registration Permit system.

Camping Permits provide information on occupied unit nights and the type of campsite service used (basic, electrical or full service). Camping use figures are drawn from revenue remittance documentation summarized by the Licensing Section. Occupancy figures summarize weekday, regular weekend and long weekend demand and are produced from daily occupancy information submitted from campgrounds on Campground Use Reports. Reservation use is drawn directly from the Parks Reservation Service database.

It is important to note that in any self-registration system, non-compliance (i.e. campers not registering) can adversely affect the reliability of camping use statistics. This problem is normally addressed by compliance checks conducted by park staff.

2.0 VEHICLE ATTENDANCE METHODOLOGY

During the months of May to September, vehicle attendance statistics are based on figures collected from automatic traffic counters. Periodically it is necessary to observe vehicle traffic patterns and compare these observations to counts from the traffic counter. This determines the accuracy of the traffic counter, or alternatively, the magnitude of error in the counter's functions and what adjustment factor, if any, must be applied to the reported counter readings in order to produce a more accurate vehicle count. When traffic counter readings are not available, the total vehicle counts are supplemented by estimates.

3.0 GLOSSARY OF TERMS

Basic Site: A designated campsite with basic service (not provided with electricity, sewer or water).

Electrical Site: A campsite where electrical supply is available.

Fully Serviced Site: A campsite where electrical, sewer and water hook-ups are available.

Group Use: Camping or day use by organized groups in formally designated areas.

Seasonal Camping: Road accessible camping where the permittee is authorized to occupy a designated campsite for the complete camping season. Sites are normally issued through a draw process. Units must be removed at the end of the season.

Transient Camping: Road accessible camping where the permittee is authorized to occupy a designated campsite for a period of one to twenty-one nights.

Unit Night: One campsite occupied for one night.

Water & Electrical Site: A campsite where water and electrical hook-ups are available.

4.0 WEATHER AND OTHER FACTORS AFFECTING VISITATION

Summer temperatures across Manitoba in 2002 were slightly above normal. However, the season got off to a slow start across the province with all locations reporting May temperatures 3 to 5 degrees cooler than normal. Temperatures improved slightly in June and July, with reported temperatures for August dipping below normal in the southern part of the province.

Precipitation was variable across Manitoba throughout the summer of 2002, with southern locations reporting slightly higher than average precipitation overall, and the north reporting precipitation levels well below normal.

Regionally:

Winnipeg: Temperatures in May were 3.6 degrees cooler than normal. Temperatures improved slightly in June and July, with reported temperatures for August dipping below normal. Overall seasonal precipitation was slightly above normal (+10.8 mm's), with highest monthly rainfalls reported in July and August.

Brandon: Temperatures in May were 3.4 degrees cooler than normal. Temperatures improved slightly in June and July, with reported temperatures for August dipping below normal. Overall seasonal precipitation was above normal (+23.4 mm's), with highest monthly rainfalls reported in June and August.

Dauphin: Temperatures in May were 2.8 degrees cooler than normal. Temperatures improved slightly in June and July, with reported temperatures for August dipping below normal. Overall seasonal precipitation was above normal (+25.3 mm's), with very high monthly rainfall (over 100 mm's) reported in June and August.

The Pas: Temperatures in May were 3.5 degrees cooler than normal. However, unlike the rest of the province, temperatures for the balance of season remained above average. Overall seasonal precipitation was well below normal (-50.5 mm's), with all summer months except for September reporting lower than average precipitation.

5.0 2002 CAMPING AND PARK VEHICLE PERMIT FEES

Camping fees vary between campgrounds depending on the availability of surcharged services such as modern washrooms, showers, hook-ups and complimentary firewood. Minimum nightly fees apply in the case of group camping.

Transient	Basic Sites	$7.00 to $14.00
	Electrical Sites	$10.00 to $16.00
	Electrical & Water Sites	$14.00
	Full Service Sites	$17.00
Group		$7.00 to $14.00
Seasonal	Basic Sites	$270.00 to $480.00
	Electrical Sites	$330.00 to $540.00
	Full Service Sites	$510.00 to $570.00

Park Vehicle Permits are required year-round in provincial parks.

Annual Park Vehicle Permits	Motor Vehicles (non buses)	$20.00
	Buses	$78.00
Casual Park Vehicle Permits (valid for 3 consecutive days)	Motor Vehicles (non buses)	$5.00
	Buses	$21.00

6.0 SYSTEM OF PROVINCIAL PARKS AND NATURAL AREAS

As of July 1, 2002 there were 76 provincial parks and 16 park reserves with a total combined land base of approximately 4.7 million hectares, or 7.1 percent of the total land base of Manitoba. These areas contribute to the conservation of our natural lands and cultural heritage, offer excellent camping, cottaging and other outdoor recreation opportunities, and contribute to Manitoba's economic well-being through tourism and resource development.

Together, Manitoba's provincial parks form the provincial park system. The purposes of this system are defined in *The Provincial Parks Act* as:

(a) to conserve ecosystems and maintain biodiversity;

(b) to preserve unique and representative natural, cultural and heritage resources, and;

(c) to provide outdoor recreational and educational opportunities and experiences in a natural setting.

The park system comprises areas intended primarily for recreation as well as areas that have an important role in protecting natural landscapes. Many of our larger parks serve a variety of purposes including protection, recreation and resource use.

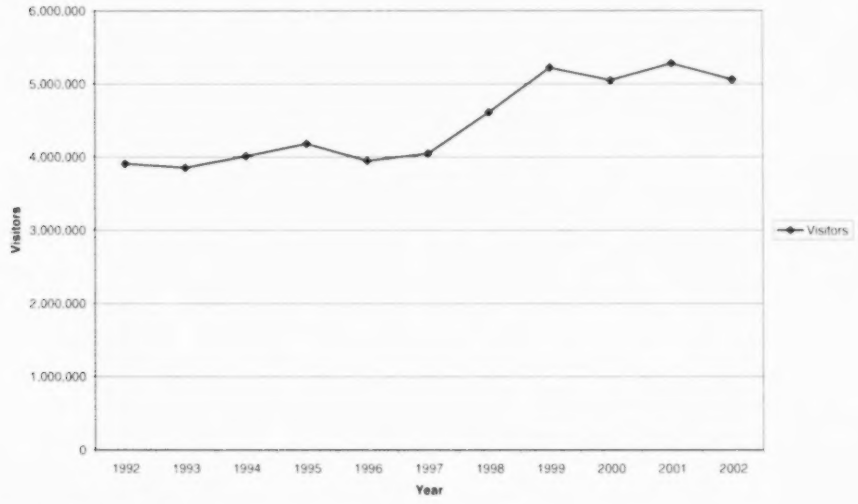
7.0 PROVINCIAL USE STATISTICS (VISITATION HIGHLIGHTS)

7.1 Park Visitors

An estimated 1,444,196 vehicles were recorded entering Manitoba's provincial parks in 2002 (down 4.1 percent from the 2001 figure of 1,506,397 vehicle entries, but up 14.7 percent from the average of 1992 through to 2001).

Total visitor volumes to provincial parks, as recorded by vehicle counts (an average of 3.5 persons per vehicle is assumed), hovered around the 4 million mark for much of the 1990s. This was a drop from the figures reported in 1989 (4.3 million) and 1990 (4.5 million). Visitor volumes have rebounded since 1998, with an estimated 5.1 million visitors reported in 2002.

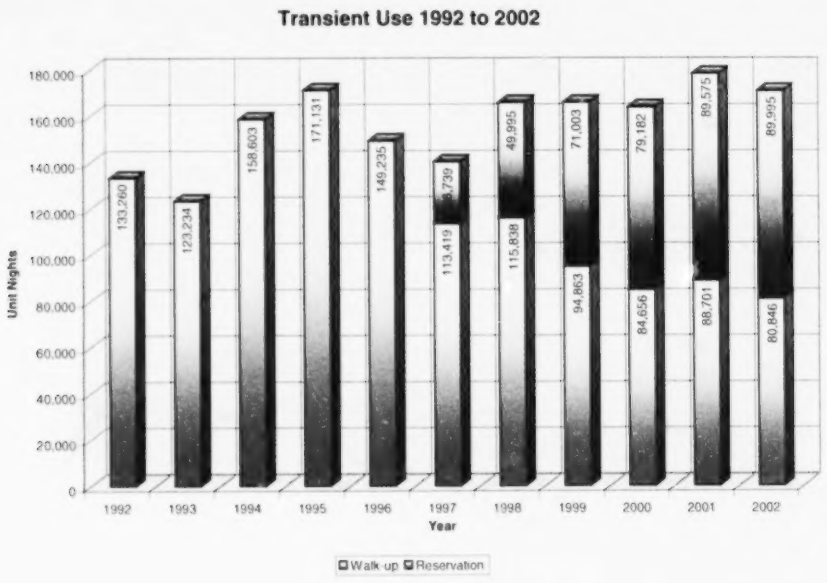
Provincial Park Visitors - 1992 to 2002



7.2 Transient Camping

In 2002, there were approximately 4,287 transient campsites available in Manitoba provincial parks, of which 2,526 or 58.9 percent were available for reservation. In terms of services, sites were divided into: 2,804 (65.4 percent)

basic, 1,397 (32.6 percent) electrical, 9 (0.2 percent) water & electrical and 77 (1.8 percent) full service sites.



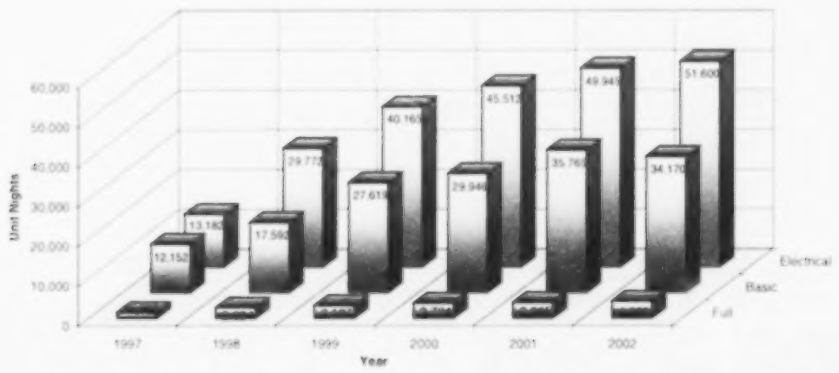
A total of 170,841 transient unit nights were sold in 2002. This was down 4.2 percent from the previous year's figure of 178,276 transient unit nights sold, but up 10.3 percent from the average of 1992 through to 2001. A late spring, combined with higher that normal rainfall in much of the province, were likely strong factors in the noted decrease over 2001.

Provincially, 2002 transient camping demand consumed 30.8 percent of unit nights available. During the traditional peak demand period from the July long weekend through to the August long weekend, campground occupancy averaged 54.7 percent in 2002, with 73.1 percent occupancy on regular weekends and 92.0 percent on long weekends.

In reviewing trends in transient camping it is important to consider the impact of the Parks Reservation Service. Reservation volumes have grown significantly since the service was introduced in 1997, with 33,734 reservations recorded in 2002. Included in this number are 31,991 transient camping reservations that accounted for 89,995 unit nights (52.7 percent of total transient unit nights), generating an average length of stay of 2.8 nights per reservation. In 2002, reservations were offered in 38 campgrounds, 23 group use areas and two cabin locations. The service has been responsible for an observed shift in campground use. Traditionally lesser-used facilities are becoming busier as customers opt for alternative locations, as their first choices become unavailable. For stays of short duration, weather is becoming less of a factor because of the commitment that is made when making a reservation. In addition, a higher proportion of total unit nights is taking place on weekends, as the reservation service takes away the uncertainty of finding a campsite during busy times.

The Parks Reservation Service affords us the opportunity to examine the breakdown of transient unit nights on the basis of level of service. As illustrated above, reservation demand has grown steadily since introduction of the service in 1997. At 57.3 percent, demand for electrical sites continues to overshadow

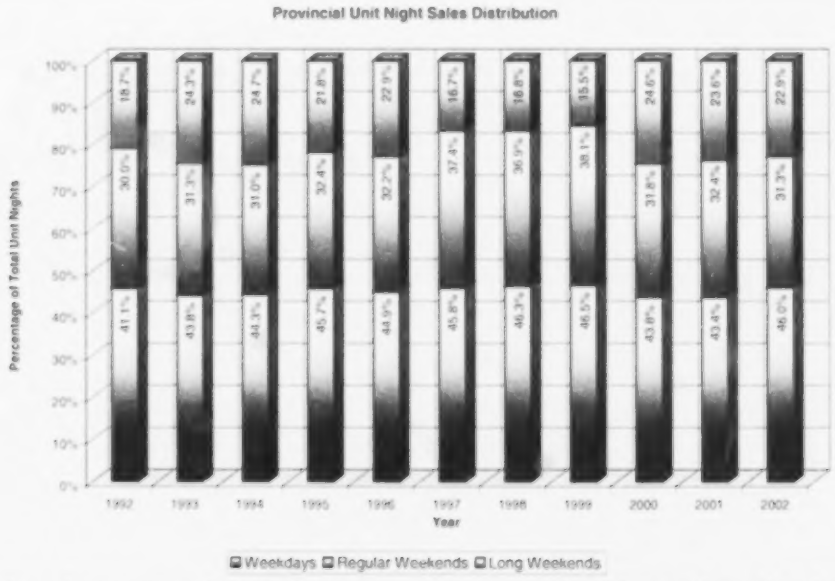
Reservation Unit Night Sales



demand for basic and full-service sites combined. This is despite the fact that only 40.5 percent of reservable site inventory are electrical. Clearly, customers seeking electrical sites are more likely to use the Parks Reservation Service. Full service site use has nearly reached its' capacity and is limited by the relatively few sites available (i.e. Manitoba Parks has 77 transient full service campsites, of which 66 are reservable).

Weekdays represented 46.0 percent of total unit nights in 2002, while regular

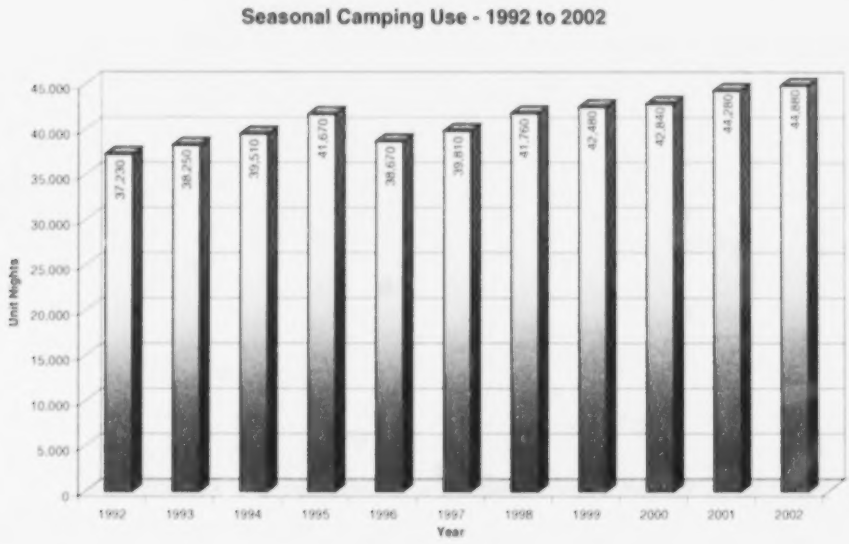
Provincial Unit Night Sales Distribution



weekends represented 31.3 percent. Long weekends continued to be busier in 2002, with 22.9 percent of overall use, up from 15.5 percent in 1999.

7.3 Seasonal Camping

Seasonal camping unit nights have grown steadily throughout the last decade, with an estimated 44,880 unit nights (1,496 seasonal sites sold) reported in 2002. The seasonal camping program has been undergoing a rationalization in recent years, as a response to growing transient demand. Where transient demand warrants, seasonal sites have been converted to either walk-up transient or reservable transient status. It is felt that the Parks Reservation Service allows for the sale of transient sites many times over throughout the season, and that the combination of reservations and walk-up camping opportunities satisfies the



needs of the largest number of visitors. On a provincial level, this has not affected seasonal camping use, as site reductions have generally focussed on undersold capacity. However, there are a growing number of campgrounds where seasonal camping demand exceeds available supply.

7.4 Group Camping

The collection of statistics on group camping is in its' infancy in Manitoba Parks. Standard group permits, upon which use statistics are based, were introduced in 1999 and group permitting procedures are evolving. All 25 group areas with the exception of Paint Lake and Caddy Lake are available through reservation only. In 2002, 994 group reservations were made. Permits indicate that 6,063 group unit nights were sold. It is expected that these figures continue to under-represent actual group use. Not all groups are being issued permits, and many permits only include the minimum number of units required to make a reservation. Additional units are frequently not being tallied. Suffice it to say,

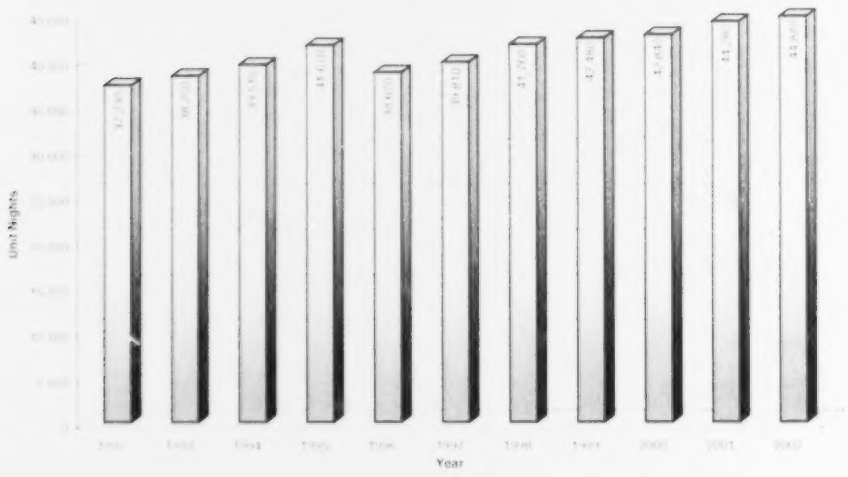
Seasonal Camping Use - 1992 to 2002

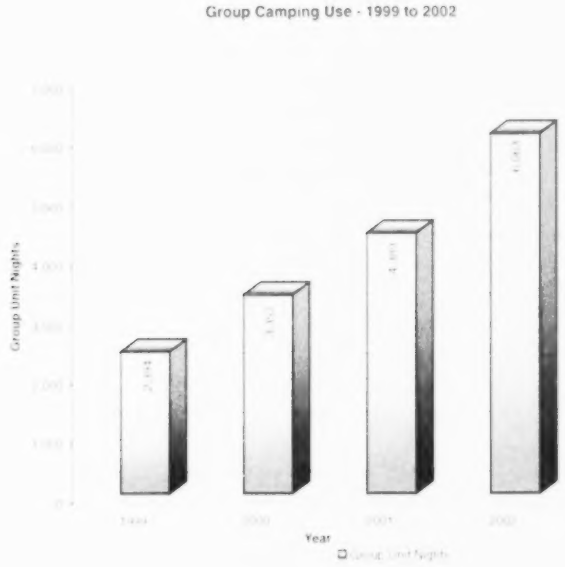


needs of the largest number of visitors. On a provincial level, this has not affected seasonal camping use, as site reductions have generally focussed on undersold capacity. However, there are a growing number of campgrounds where seasonal camping demand exceeds available supply.

7.4 Group Camping

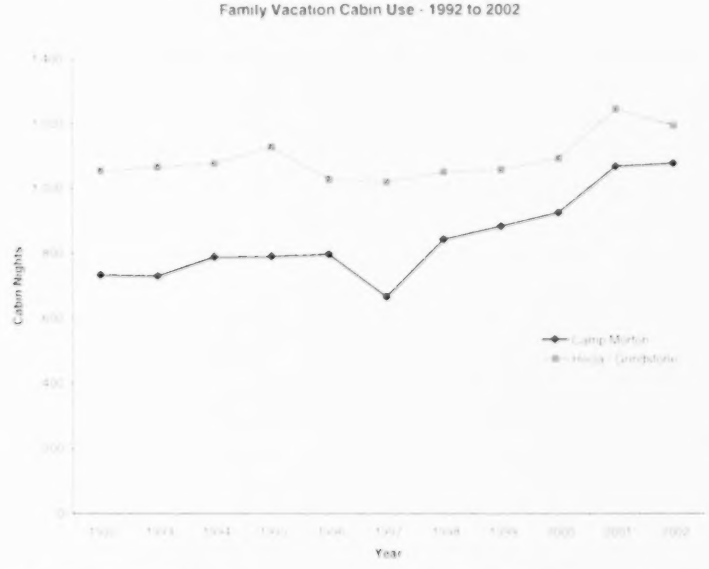
The collection of statistics on group camping is in its' infancy in Manitoba Parks. Standard group permits, upon which use statistics are based, were introduced in 1999 and group permitting procedures are evolving. All 25 group areas with the exception of Paint Lake and Caddy Lake are available through reservation only. In 2002, 994 group reservations were made. Permits indicate that 6,063 group unit nights were sold. It is expected that these figures continue to under-represent actual group use. Not all groups are being issued permits, and many permits only include the minimum number of units required to make a reservation. Additional units are frequently not being tallied. Suffice it to say,

however, group permitting procedures and the resulting statistics are expected to improve over time.

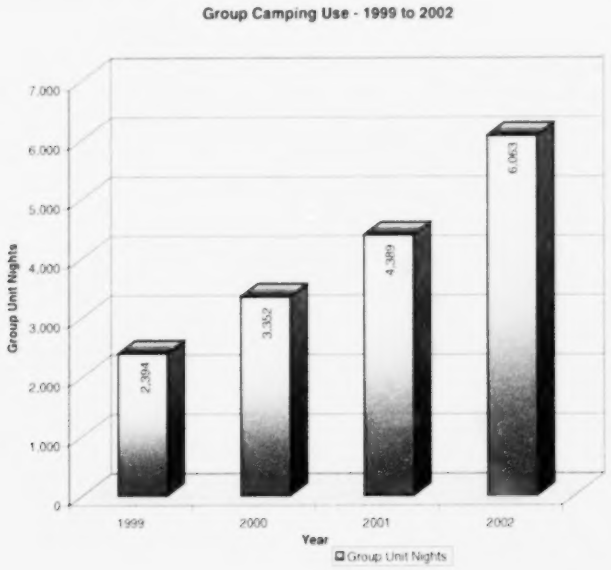


7.5 Family Vacation Cabins

Family Vacation Cabins are located in Hecla / Grindstone and Camp Morton provincial parks. There are 15 cabins at Hecla / Grindstone and 10 cabins at Camp Morton. In 2002, a combined total of 2,265 cabin nights were occupied at the two locations (i.e. 1,074 at Camp Morton and 1,191 at Hecla Grindstone). This is a decrease of 1.8 percent over the 2001 season, but up 19.1 percent from the average of 1992 through to 2001.

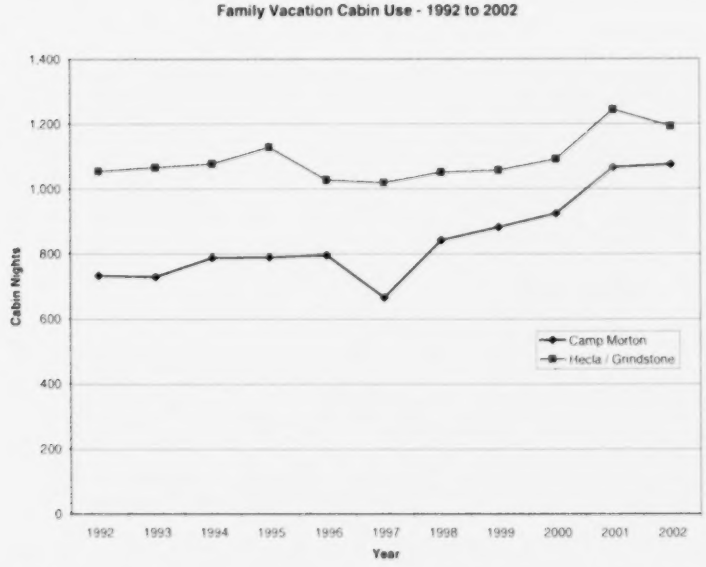


however, group permitting procedures and the resulting statistics are expected to improve over time.



7.5 Family Vacation Cabins

Family Vacation Cabins are located in Hecla / Grindstone and Camp Morton provincial parks. There are 15 cabins at Hecla / Grindstone and 10 cabins at



Camp Morton. In 2002, a combined total of 2,265 cabin nights were occupied at the two locations (i.e. 1,074 at Camp Morton and 1,191 at Hecla Grindstone). This is a decrease of 1.8 percent over the 2001 season, but up 19.1 percent from the average of 1992 through to 2001.
